Responsibilities – As per the company's policy, learners are provided with a vast number of technologies exposure and practical hands-on experience which is currently required by the IT Sector. The learners complete theoretical training and practical exercises while creating the building blocks of a small application over the first five months of the learnership programme. Thereafter, they are required to complete a three-month project simulation and finish their programme with two months of work-integrated training. As a result, they receive 10 months of training.

The purpose of training the individual is to ensure the individual is multi-skilled in all fields to allow them to have the opportunity to grow within any field.

Should you have any other further queries, please do not hesitate to contact me.
